

MAINTENANCE CHECKLIST

SILENCER HYDRAULIC CATTLE CRUSH

Date: _____.

Inspected by: _____

Daily Maintenance

- Perform visual inspection for hydraulic leaks, worn hoses, loose bolts, or structural damage.
- Ensure no debris is obstructing moving parts.
- Check hydraulic hoses and fittings for any signs of wear or damage.

Weekly Maintenance

- Lubricate all moving parts, including hinges, pivots, and hydraulic cylinder connections.
- Use manufacturer-recommended lubricants.
- Clean the equipment to remove dirt, manure, and debris.

Monthly Maintenance

- Inspect hydraulic system components, including hoses, cylinders, and fittings.
- Check hydraulic fluid levels and top up if necessary.
- Tighten all nuts, bolts, and clamps to prevent loosening due to vibration.

Annual Maintenance / 500 Hours

- Drain and replace hydraulic fluid as per manufacturer guidelines.
 - Change hydraulic filters if applicable.
 - Inspect the electrical system (if applicable) for damaged wiring and secure connections.
 - Check structural integrity for cracks, rust, or damage; repair or replace parts as needed.
 - Test emergency stop mechanisms to ensure proper functionality.
-

General Maintenance Best Practices

- ✓ Keep the unit clean and free of debris after each use.
- ✓ Store the cattle crush in a dry, sheltered location when not in use.
- ✓ Monitor for unusual sounds, slow movement, or resistance and inspect immediately.
- ✓ Proactively replace worn-out components before failure occurs.
- ✓ Follow manufacturer guidelines for maintenance and servicing.
