SHEEP PREGNANCY SCANNING COURSE

COURSE INFO

- upon enrolment, students will receive confirmation of their official start date and class timetable from their Trainer
- If applicable, details about the course induction and directions for the first day will also be provided

COURSE OVERVIEW

The Sheep Pregnancy Scanning Course is a short, non-accredited course that introduces Students to the fundamental skills and knowledge required to prepare for, conduct and support pregnancy scanning in sheep.

It covers -

- Preparation and set up
- assisting with pregnancy scanning
- performing the procedure
- carrying out post-scanning tasks as well as
- understanding of the reproductive tract

This course is ideal for those wishing to gain hands-on experience in sheep pregnancy scanning on their own property or in a professional setting.

Please Note:

This course provides introductory sheep pregnancy scanning skills and is not designed for advanced scanning of twins or multiple pregnancies. On occasion, twins may be observed; however, this is not the goal of the course nor guaranteed, as the availability of sheep with multiple pregnancies will vary. Students seeking advanced twin or multiple pregnancy detection should pursue specialised training.

DURATION

Run over a 2 week period -

This includes -

- being given access to self-paced online learning (approx. 2 hours total learning time) to be ideally completed prior to the practical training. Access is given to online content 1 x week prior to the practical sessions.
- optionally engaging in your own research and self-directed learning to consolidate understanding and prepare for practical training then,
- 2 x full days of face to face, practical training including theory and hands on opportunity for every student to put it all into practice! Student numbers are kept small to facilitate this.

SHEEP PREGNANCY SCANNING COURSE

REQUIREMENTS

- This involves working outdoors and handling livestock in a variety of conditions.
- Students should be physically fit and have some previous experience with livestock.
- Students must arrange their own transport and accommodation to their practical training sessions.
- Students are required to provide suitable boots and clothing for outdoor weather conditions.
- Students are required to have access to a computer and internet to complete the online training portion of the course. All other learning resources and equipment will be provided for the duration of the course.
